Memoir Volume 3-4 (Paperback)

By Anonymous

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 edition. Excerpt: .and the pygidial pleura simple. The latter is believed to be limited to Mesodevonic faunas (P. rana, Hamilton, P. latifrons, Eifelian), while the former is widely disseminated as a characteristic Paleodevonic group. To this belong the Helderbergian species. Of Acidaspis we have two species; A. tuberculata is related to the Onondaga A. callicera. The remarkable A. hamata (genus Dicranurus) with long, recurved cervical horns, finds its only known analogue and almost specific identity in the A. monstrosa, Barrande, of the etage G (Paleodevonic). Lichas is represented by L. pustulosus, the most abundant species, which seems to indicate a type of subgeneric structure not elsewhere presented. L. consanguineus belongs to the subgenus Arges and has species both in the Siluric and Devonian. The single species of Proetus (P. protuberans) in the Helderbergian of New York is of rare occurrence. In type of...

Reviews

I actually started looking over this publication. It really is rally interesting throgh studying period. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Dana Hintz**

Good electronic book and valuable one. It really is basic but unexpected situations in the 50 percent in the pdf. You wont really feel monotony at at any moment of your time (that's what catalogues are for concerning when you ask me).
