This ebook is worth acquiring. Better then never, though i am quite late in start reading this one. You will not truly feel monotony at at any time of your own time (that's what catalogues are for about if you ask me).

Brand New Book ***** Print on Demand *****.A New Paradigm: We require systems which run parallel to natural ones, not against them. For example, regional, closed-loop (No waste, cradle to cradle), self-sufficient, decentralized systems (Horizontal vs. Hierarchical). Sustainable systems which are NOT based on constant economic growth consumption. The organization of self-managed, egalitarian, and highly co-operative societies. This will require a shift in consciousness which recognizes our interconnectedness and interdependence on each other and nature. A shift from ego-systems to eco-systems. Politicians are merely puppets (Pawns, proxies), of private interests. The media governments role in two words- controlled opposition (Corporate tools). The fundamental problem is this entire unsustainable system driven by consumption economic growth. A fraction of the resources spent on the military industrial complex, corporate welfare, etc. would solve all the ecological, social, and economic problems we face.
